SKILLS

FRAMEWORKS

OTHER-SKILLS

PROJECTS

Static Website

www.bharathj.com

https://github.com/bharath857/Static_website

Built and deployed personal static website end to end. Used front end stack like HTML and CSS along with Bootstrap framework.

Company-employee-API

Company-employee information system

https://github.com/bharath857/Company_employee_information_system

Created a backend for company employee API using Nodejs(Express.js-Framework) that can create, update and manage employee information, Search employee within a company, by his name, employee id or phone number that is stored in database.

Stack/Tools Used - ● Postman ● Node JS ● MongoDB

Chatroom

Chatroom-Application

<https://github.com/bharath857/Chatroom>

Created a chatroom where users can login by authenticating and send communication in real time. This Application has been built end to end using both front-end and back-end stack.

Stack/Tools Used - ● Node.js ● Socket.io ● Bootstrap
