SKILLS

- Node.Js
- JavaScript
- Angular JS 2 +
- Mongo DB
- HTML
- CSS
- Selenium
- Java
- Vb Script

FRAMEWORKS

- Express.js
- Bootstrap
- Gradle

OTHER-SKILLS

- Postman
- Agile Methodology
- Kanban
- Git and GitBash
- Visual Studio

EXPERIENCE

2018 - Present

Tata Consultancy Services
MEAN Stack Developer

• Currently working as software developer, working on technologies like Angular, C#, React, Nodejs.

• Written resuable code as part of team, this directly impacted in timesaving across of multiple projects. This was done by creating librarys which team could reuse based upon functionality

• Worked on CI/CD pipelines for smooth delivery of software through SDLC via Automation.

• Worked with leadership team to Design and Architect of application(focus area was front-end) and implemented coding standards and architectural practices

• Wrote functional unit test cases in angular using karma and jasmine this directly impacted in reducing time for UAT team(testing team)

• Responsible for creating efficient design and developing user interaction screens using Angular and Node.

• Experience with creating custum directives, reusable components, templates and worked on advanced Javascript such as ECMAScript 6(ES6).

• Designed and developed the application using Agile scrum and kanban methodology to provide more efficifent work and higher quality

• Worked on REST/web API to create the services and tested on postman and used in angular to bind data,

• Implemented HTTP requests using RxJS Observable library to handle multiple values over time.

• Fundamental knowledge of application development using technologies like Node.JS, REST and Frameworks such as Express.js.

• Experience RESTful API design and development

• Have a strong delivery track record, excellent problem-solving skills, and high interest in all the latest tools Strong understanding of NPM and modular application development skills building

PROJECTS

Company-employee-API

Company-employee information system
https://github.com/bharath857/Company_employee_information_system

Created a backend for company employee API using Nodejs(Express.js-Framwork) that can create, update and manage employee information.
Stack/Tools Used   -   ● Postman   ● Node JS   ● MongoDB

Weather-Details

Find Weather-Application
Weather-app

This project helps you find weather anywhere just by giving location. You will getting time Zone and weather condtions of the given place.
Deployed in heroku
Stack/Tools Used   -   ● Node.js   ● Angular 8   ● MongoDB

Task Manager api/ui

Task Manager
Task Manager Application

App that helps us to make note of task and monitor task's with unique login crediantial's this app has both Ui which is built on angular and backend buit on nodejs deployed in heroku for user better experience
Stack/Tools Used   -   ● Node.js   ● Angular   ● MongoDB
